

Momot Danil

System Programmer

✉ momot.do@phystech.edu

☎ +7-(985)-343-86-93

📍 Russia, Dolgoprudny

🔑 usr045

📅 13.06.2006

✉ @usr045

PROFILE

Area of professional Interests:

- system programming in C/C++
- machine learning systems and infrastructure
- linux kernel and computer architecture
- multithreading and Concurrency
- memory Management
- high-performance computing and CPU/GPU performance optimization

LANGUAGES

Russian ● ● ● ● ●

English ● ● ● ● ●

HARD SKILLS

- C++, C, Nasm, Linux
- CMake, Makefile, Git
- Radare2, Valgrind
- LaTeX, Markdown, Graphviz
- RaspberryPi, GPIO, Python

SOFT SKILLS

- Team working
- Quick learning
- Communicaton skills

EDUCATION

MIPT (Moscow Institute of Physics and Technology)

2024 – present | Dolgoprudniy

Department of Radio Engineering and Computer Science

Huawei Os Kernel Lab

07/2025 – 08/2025 | Moscow

Internship in the summer

COURSES

Studying system programming and C language

I.R. Dedinskiy

Fundamentals of computing systems architecture and assembly programming

I.R. Dedinskiy

C++ course

K.I. Vladimirov

Introduction in Tensor Compilers

Course from Sber

Architecture of computing units

Course from Sber

PROJECTS

TensorCompiler [↗](#)

The C++ project was aimed at creating a tensor compiler frontend for neural network computing graphs.

WheelSimulator [↗](#)

A simulator project dedicated to wheel and motion modelling.

SnakeGame [↗](#)

An extraordinary snake game written in C++.

Mandelbrot [↗](#)

Writing an optimization of the calculation algorithm using SIMD

HashTable [↗](#)

A C hash table implementation with a focus on efficient data storage and retrieval.

Printf [↗](#)

Implementation of a custom print function similar to C's standard function
